

# Tewksbury Master Plan

## Traffic & Circulation MAP 3 Transportation Concepts

### Key Ideas

- A walkable Town Center.
- Pedestrian and bicycle access along Route 38 and points of entry to the Town Center.
- Access management through curb cut consolidation, shared driveways.
- Subordination of parking to building form.
- Inviting, attractive gateways that encourage responsible driving.

### Legend

- Roadways
  - Limited Access Highway
  - Multi-Lane Highway
  - Other Numbered Route
  - Railroad
  - Town Roads
- Open Water
- Streams

0.5 0 0.5 Miles

Roads should accommodate cars and pedestrians. Sidewalks separated from the street with attractive landscaping encourage walking and bicycling, provide safe access for persons with disabilities, and foster thriving business areas.

Gateways should express community pride and promote traffic safety.

An attractive, walkable town center is key to a community's sense of identity.

Raised crosswalks promote safety, slow traffic.
