**EXISTING  
INFRASTRUCTURE**

# PEDESTRIAN MOBILITY DEFICIENCIES

- Fragmented sidewalk network
- Lack of sidewalks on major corridors
- Difficulty traveling from Point A to Point B
- Sidewalk locations are inconsistent - switch from one side of road to other
- Unsafe crossing high-volume roadways
- Inability to access existing sidewalks
- Deteriorating sidewalk conditions

# WALK SCORE = 49 “CAR DEPENDENT”

On a scale of 0 - 100, Tewksbury scores 49, indicating most errands require the use of an automobile.

# GOALS & OBJECTIVES

# TYPES OF PROJECTS

## Points of Interest

Constructing sidewalks to popular destinations

## Eliminating Gaps

Uninterrupted sidewalk presence from Point A to Point B

## Main Roadways

e.g. Shaw sheen, Whipple, Pleasant, Chandler, etc.

## Loops

Continuous circuits for improved recreational use

# GOALS

## Increase Connectivity

Connect fragmented segments of existing sidewalk for better usability

## Recreation

Promote outdoor exercise (walking, jogging, running)

## Access to Destinations

Provide walkable routes to popular municipal & commercial destinations

## Safety

Reduce the potential for accidents with motorized vehicles
