

How to Prepare Before a Winter Storm

Store Your Carts for a Winter Storm

During a winter storm, safely store your waste and recycling carts with one of these methods:

- ✓ Pull your carts inside your garage so they're protected from the weather.
- ✓ If it's windy, secure your carts closed and against the house with chains or bungee cords.
- ✓ Purchase a container shed, which will help keep snow out, as well as your containers secure.

Be proactive and prepared.
